 - style2-bg.css, same as previous but with background images included
 - Green theme
 - style3.css
 - style3-bg.css, same as previous but with background images included
 - Orange theme
 - style4.css
 - style4-bg.css, same as previous but with background images included
 - Pink theme
 - style5.css
 - style5-bg.css, same as previous but with background images included
 - Black theme
 - style6.css
 - style6-bg.css, same as previous but with background images included

Original CSS layout

- The Universatil's template is based on the Skidoo Redux CSS Layout. Main advantages
 - Source Ordered – SEO +++
 - No Tables
 - Very Compatible
- Skidoo Redux is a float-based CSS layout. You may like or not float-based layouts. If you don't feel comfortable with this technique, feel free to choose any other CSS layouts.
- The Skidoo Redux CSS layout port into Joomla has been proven very stable & cross browser for Joomla templates (1.0x or 1.5 family)
- More information here:
http://webhost.bridgew.edu/etribou/layouts/skidoo_redux/index.html

Joomla 1.5 template contest - Basic Instructions

4/4

- if No, then lightweight loading template
- param name="accessibility"
 - o Enable accessibility (mostly inactive for now – Set to No if you don't want the Beez override files, and do not forget to delete or rename the html folder.)
- param name="timer"
 - o Show/Hide Page load timer – Design purpose only
- param name="showComponent"
 - o Show/Hide Components' output – Design purpose only
- param name="compressed"
 - o Use compressed files – Production sites only
 - if Yes, then lightweight loading template, with lower HTTP requests & lower size CSS file
 - If you modify the Universatil's CSS files and you wish to activate this parameter, you will need to produce your own CSS compressed files manually & place them in templates/universatil/css/compressed/ folder:
 - STEP 1 - Gather layout.css, hnav.css, vnav.css, theme.css, joomla.css into a new theme.css file placed in templates/universatil/css/compressed/ folder, then COMPRESS
 - STEP 1 - We have compressed init.css into a new init.css file placed it in templates/universatil/css/compressed/ folder, then COMPRESS
 - 55thinking recommends Ikey CSS Compressor:
http://iceyboard.no-ip.org/projects/css_compressor
 - Please also activate cache & gzip compression parameters in the Global configuration file if performances do matter to you
- param name="toggleGA"
 - o Enable Google Analytics – Production sites only
- param name="GAaccount"
 - o Enter Google Analytics account – Production sites only
- param name="showcredit"
 - o Show/Hide credit links
